FREEZEALARM from *Control Products*

*Protects your home & vacation property from **FROZEN PIPES***

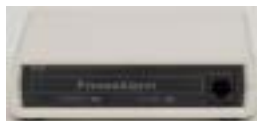

Your home or vacation property is a valuable asset you shouldn't have to worry about while you're away. Bad weather, power loss or furnace failure can cause significant damage to your home and valuables. The **FreezeAlarm** is the affordable solution, assuring you peace of mind. The **FreezeAlarm** automatically calls any phone number to alert you of a drop in temperature or power loss inside your primary residence or vacation home.

Basic FreezeAlarm Model FA-B-CAA

\$99.00 plus \$9.00 S & H

The Basic FreezeAlarm provides the most cost effective method of protecting your home or property from damaging frozen pipes. This model calls out to one telephone number of your choice when the temperature drops below 45° F (7° C). Those answering the call will hear an alarm tone. It will continue to call until you call back to the unit and discontinue the call-out feature. Unit resets when temperature rises above 45° again. Unit operates on a 9 volt alkaline battery (not included) and can utilize an existing standard, single telephone line.

Intermediate Freeze Alarm - °F Model FA-I-CAA **OUR MOST POPULAR MODEL!**

\$195.00 plus \$11.00 S & H

This popular model calls up to three phone numbers and alerts you to one of three emergencies at a monitored home, cabin, cottage, business or even a refrigerator or freezer in a restaurant. This model will call you if the temperature gets too low (or too high as well), it will call if the power has been out for 1 hour or more, and it will call you if the backup, 9 volt battery needs replacing. You gain extra peace of mind with this model because you can call up anytime, from any phone in the world and hear what the current temperature is, find out if the power is on or off in your home or cabin, and even check the voltage of the backup battery. You can also change any of the settings and phone numbers remotely. Clear, digitized voice messages tell you exactly what is happening at the monitored location. Plus, you can even create your own custom greeting message that is played when the unit calls you or when you call into your FreezeAlarm.

Deluxe FreezeAlarm - °F Model FA-D

\$299.00 plus \$12.00 S & H

The Deluxe Model offers all the features of the Intermediate (FA-I) model plus additional features. A unique feature of the FA-D is an auxiliary alarm input for monitoring a dry contact device such as a water alarm. If water is sensed across the water sensor, the FA-D has the ability of call out to three phone numbers and warn you of water problems.

Also available is a switched output that can remotely switch two thermostats, one set to a higher temperature and one set for a lower temperature. Switching them by telephone allows you to heat up or cool down a home or vacation property before you arrive.

Water Alarm Plus Model WA-10

\$49.95.00 plus \$9.00 S & H

This beefed up waterAlarm can detect the slightest film of water and sound an audible alarm, it can also be hooked up to our Deluxe FreezeAlarm and when water is detected, tell the FreezeAlarm to dial out and warn of impending water damage. The waterAlarm may also be used with alarm systems that allow for devices to close a contact to trigger the alarm device. You can also use this model as a stand alone water sensor. Unit operates on a 9 volt alkaline battery (not included). Audible alarm will sound for up to 36 hours on a fully charged battery. Includes a suction cup to use

No Installation or Monitoring Fees for the FreezeAlarms - Installation is as simple as plugging in a phone line. The FreezeAlarm literally talks you through the programming of phone numbers. FreezeAlarms call when there is a problem so there is never a monitoring fee or service.

Affordable Protection for your home - With three models to choose from, every home owner has an option to meet their specific needs. Winter travelers may look to our most popular Intermediate model, or look for simple, inexpensive protection with the Basic model. For Lake home or cottage owners, the Deluxe model provides excellent temperature and power protection and the ability to hook in our water alarm for added protection.
